

Mashification Manual

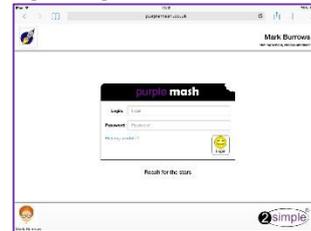

For using 2DIY Games on Tablets

This only applies to the 'Games' section of 2DIY which contains flash-based programs that run on iPads using a special app.

Mashifying (unlocking) the iPad apps occurs when the app you have downloaded is launched for the first time via a logged in Purple Mash account.

1. First download the app, by searching for '2Simple' on the Appstore and getting the 2Do it Yourself app.

2. On your iPad, open the Safari browser, and login to Purple Mash using a valid username and password
3. Navigate to 2DIY, found in the Tools section.
4. The app will start and will be fully unlocked as long as you have a valid Purple Mash subscription.

This process won't need to be repeated unless your app is removed from the device.
We are working towards removing the need for this step.
