

Remote teaching and learning with Purple Mash Part 8

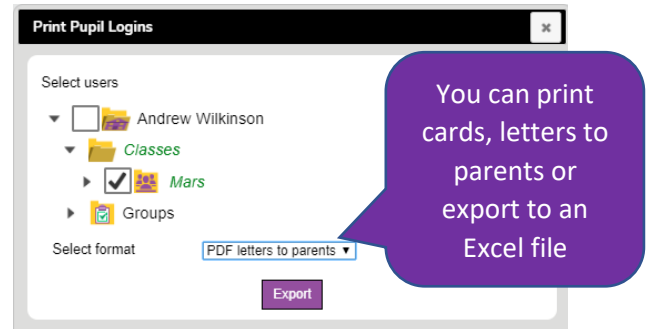

Parents and Purple Mash

With pupils working at home, you may want to involve parents more?

Make sure you have sent the login details home. You can even print off a letter to send home with the login card embedded in it. The login cards have a parent code, that allows a parent to create their own account. The parent account can be used to access Purple Mash for all pupils the parent may have at your school.

To print login cards just open Purple Mash and from the home page > Admin > Print Pupil Logins > Select class/individuals/group > Select format

So what do the parents see?

If you are Early Years and using Mini Mash, then you can add activities to a tray and pin them to the Home page of Mini Mash for quick access. You can even create your own activities with the Teacher Tools, add these to a tray and then pin this to the Home page in Mini Mash. See Help section behind the Mini Mash button for support videos.
